With summer approaching and the weather warming up, our desire to look great intensifies. Luckily, it's possible to attain a beautiful and natural look in a short period of time, and without the need for surgery. Many people are now opting for minimally invasive treatments or 'tweakments' – beauty procedures that offer naturally flattering results without downtime or discomfort, giving you the look you’ve always craved.

Revere Clinics have a spectrum of non-invasive beauty 'tweakments' for all skin types and body complexions. If your summer months are packed with wedding invitations, tickets to glamorous events and exciting holiday plans, you will no doubt want to look your absolute best. Looking good and feeling great is something many of us wish for. With a new range of non-invasive treatments, you can target your problem areas and naturally enhance your features.

**TOP 3 ‘TWEAKMENTS’ IN 2016**

**HYDRATITE® FACIAL**

HydraTite® Facial is a trademark treatment at Revere Clinics, providing a definitive solution for healthy, radiant and instantly lifted skin. HydraTite is a powerful combination of two unrivalled treatments in one. The ‘tweakment’ begins with the revolutionary HydraFacial – an A-list favourite for celebrities such as Beyoncé, Paris Hilton and Kate Winslet. This gently cleanses, exfoliates, hydrates and replenishes the skin, leaving it smooth, clear and glowing. It’s a particularly special treat when combined with radiofrequency skin tightening for the ultimate immediate uplift. The result is a stunning ‘Cinderella’ effect – ideal for special events and occasions.

**LIP ENHANCEMENT**

Fuller lips symbolise beauty and youth. Lip enhancements are extremely popular, as many of us suffer from lips that lose their natural volume and shape as we age. Some patients may also have naturally less defined lips than they desire, increasing the requirement for a lip enhancement.

Revere offers a treatment to increase the natural volume of the lips as well as softening lines around the mouth to define the lip area. Dermal fillers are safely used to create subtle enhancements in just a few minutes with instant effect. The result is youthful volume, symmetry and well defined lips that don't appear puffy or overdone.

Having beauty tweakments with Revere is a wonderful way to freshen up your appearance without surgical intervention. Our small tweaks can make a big influence on how you feel about yourself and make you smile after catching your own reflection in the mirror.

Make this summer one of your best ever, and with a Revere tweakment, be bold, be confident and simply enjoy being yourself.

**SKIN TRANSFORMATION**

Revere provides its clients with a range of non-surgical solutions for skin rejuvenation, scar removal, skin resurfacing, acne and pigmentation therapy as well as vascular treatments. Subtle changes can make a significant difference, dramatically enhancing your physical appearance and well-being.

Between using radio waves to tighten the skin and vitamin A & C products to rejuvenate it, Revere tweakments can help you achieve the skin you can proudly wear, makeup free, this summer.
